OUR DELIVERY MODEL

01. The idea

- You have a specific pain point to resolve

  or

- You have a breakthrough idea that you want to make reality

02. Meeting

TOGETHER WE:

- Define your business priorities

- Identify your most practical & effective ideas

- Establish a pattern of free-flow communication & course correction based on business value

03. Sprints

- Your developer meets with you weekly to discuss business requirements or changes affecting the software design

- We equip you with the information you need to prioritize & make decisions, especially when it comes to adding new features

- Together, we manage the progress of features on deck, two weeks at a time

04. Repeat

- Repeat two-week sprints, working through new features & requirements

05. Finished

- We deliver a completed product when the development is finished & you're happy with its value

Success Cases
AI applied to stock management

Together with **Do Better** we built a suite of tools with artificial intelligence to accelerate management processes in Distribution Centers and Logistics Operations in Unilever Chile.

Insights

- First implementation in **30 calendar days.**
- Stock incident resolution time, before: **+1month**, now: **<7 days**.
- **100% remote** mode.
- **Significant reduction** in management time.

Features

- Invoice conformation.
- Rejection follow-up.
- Incident traceability.
- Stock auditability.
- Integrated with SAP and third party software.
- Early warnings for deviations.

TECHNICAL EXPERTISE & PARTNERS

We don't just <u>aim</u> for success.
We *achieve* it.

You envision, you plan, you can.

We execute, we deliver, we do.
Bridging the gap between ideas and execution.
